- **Investors can now access all VanEck ETFs**
- **The ETF provider positions itself as a pioneer for innovative and future-oriented investment solutions**

Frankfurt, May 16, 2022 – VanEck launches the distribution of its ETFs (Exchange Traded Funds) and ETNs (Exchange Traded Notes) in Portugal. The asset manager thus further expands its European presence. The asset manager from New York has already been present on the European market since 2015 and has established itself as a pioneer for smart and future-oriented investment solutions with its investment products on topics such as eSports, moat investing or cryptocurrencies as well as the semiconductor and hydrogen industries. With the new offering in Portugal, VanEck now offers investors access to its ETF range in 16 European countries.

“Expanding our offering to Portugal is the next logical step for us”, says Martijn Rozemuller, CEO at VanEck Europe. “In line with our vision, every European investor should have access to our smart investment solutions. With our ETFs, we want to offer investors in all our markets simple, modern and cost-efficient investment opportunities”.

The prices of securities in the funds are subject to the risks inherent in investing in the securities market, including general economic conditions and sudden and unpredictable price drops.

In the coming months, VanEck plans to launch additional products that provide access to multiple markets, asset classes and investment styles. Plans include additional sustainable investing ETFs and various ETNs on cryptocurrencies and digital assets. As Rozemuller states: “Our products cover innovative topics and are easily accessible. They enable our clients to build diversified global portfolios and combine different investment strategies. We will expand our business in Europe in the long term and are convinced that we can offer investors excellent and attractive choices with our range of products”.
