## Morningstar Wide Moat ETF

VanEck Morningstar Wide Moat ETF seeks to track, before fees and expenses, the price and yield performance of the Morningstar® Wide Moat Focus Index<sup>SM</sup>. The index provides exposure to U.S. companies with Morningstar® US Economic Moat<sup>TM</sup> ratings of Wide that are trading at the lowest current market price to fair value ratios. The index has a staggered rebalance in which it is divided into two sub-portfolios, each with 40 stocks. One sub-portfolio reconstitutes in December and June; the other in March and September. The information here pertains only to the sub-portfolio being reconstituted.

Fair value estimate: the Morningstar analyst's estimate of what a stock is worth. Price/Fair Value: ratio of a stock's trading price to its fair value estimate.

Economic Moat ratings represent the sustainability of a company's competitive advantage. Wide and narrow moat ratings represent Morningstar's belief that a company may maintain its advantage for at least 20 years and at least 10 years, respectively. An economic moat rating of none indicates that a company has either no advantage or an unsustainable one. Quantitative factors used to identify competitive advantages include returns on invested capital relative to cost of capital, while qualitative factors used to identify competitive advantages include customer switching cost, cost advantages, intangible assets, network effects, and efficient scale.
