U.S. Infrastructure Primed for an Upgrade

Governments and corporations are beginning to address failing U.S infrastructure with new funding and innovations that seek to not only rebuild America’s infrastructure, but upgrade it with environmental sustainability and climate resiliency in mind. With net zero carbon emission goals¹ and a growing population, trillions of dollars will be needed,² creating potential opportunities for investors.

Capture a Structural Change in Infrastructure Investing

Gain exposure to innovative companies that are benefitting from the shift in demand for green infrastructure trends. For example, electric vehicle manufacturers and their impact on battery technology, buildings being constructed and or retrofitted to be more efficient and new technology being developed to create alternative sources of energy as well as new, more renewable fuel sources. These innovations create long-term opportunities for investors within green infrastructure.

Why RNEW?

Exposure to U.S. companies with revenues primarily generated from sustainable infrastructure businesses

Diversified across seven sub-themes focused on environmental waste, construction, energy and transportation

Company and sub-theme caps create a diversified portfolio across a new, more sustainable ecosystem

VanEck Green Infrastructure ETF (RNEW) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the **Indxx US Green Infrastructure – MCAP Weighted Index (IUGIMWT)** which tracks the performance of those companies that are involved in the production, transmission or distribution of green energy and/or are engaged in business activities that seek to establish a sustainable infrastructure to facilitate the holistic use of green energy and positively impact the environment.
