

2024 Year-End Distributions

We are pleased to provide the following information which summarizes the 2024 annual distributions for the VanEck ETFs.

Passive Foreign Investment Company (PFIC) Income

Several VanEck ETFs may make investments in non-U.S. corporations classified as “passive foreign investment companies”. Generally speaking, PFICs are non-U.S. corporations having 50% or more of their assets invested in cash or securities, or having 75% or more of their gross income originating from passive sources, including but not limited to interest, dividends and rents. In other words, these foreign companies primarily derive their revenue streams from investments (rather than operations). Please refer to your VanEck ETF’s Statement of Additional Information (SAI) for further information on PFICs.

IRS Circular 230 disclosure: VanEck does not provide legal, tax or accounting advice. Any statement contained in this communication concerning U.S. tax matters is not intended or written to be used, and cannot be used, for the purpose of avoiding penalties imposed on the relevant taxpayer. Shareholders or potential shareholders of the VanEck ETFs should obtain their own independent tax advice based on their particular circumstances.

If you have any questions concerning this information or the VanEck ETFs in general, please call 800.826.2333 between 9:00 am and 5:30 pm ET, Monday through Friday.

Important Disclosure

The principal risks of investing in VanEck ETFs include sector, market, economic, political, foreign currency, world event, index tracking, active management, social media analytics, derivatives, blockchain, commodities and non-diversification risks, as well as fluctuations in net asset value and the risks associated with investing in less developed capital markets. The Funds may loan their securities, which may subject them to additional credit and counterparty risk. ETFs that invest in high-yield securities are subject to subject to risks associated with investing in high-yield securities; which include a greater risk of loss of income and principal than funds holding higher-rated securities; concentration risk; credit risk; hedging risk; interest rate risk; and short sale risk. ETFs that invest in companies with small capitalizations are subject to elevated risks, which include, among others, greater volatility, lower trading volume and less liquidity than larger companies. Please see the prospectus of each Fund for more complete information regarding each Fund’s specific risks.

Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contains this and other information, call 800.826.2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.

All registered investment companies, including VanEck ETFs, are obliged to distribute portfolio gains to shareholders at year-end regardless of performance. Trading VanEck ETFs will also generate tax consequences and transaction expenses. The information provided is not intended to be tax advice. Tax consequences of income distributions may vary by individual taxpayer. There is no guarantee that income will be paid.

To receive a distribution, you must have been a registered shareholder of the relevant VanEck ETFs on the record date. Distributions are paid to shareholders on the payment date. Past distributions are not indicative of future distributions.
